Description

Use the corner and overtake your opponent!

This left corner is made for overtaking and changing lanes! Use it to your advantage and overtake your opponent with precision skill in this corner. Your opponent is then forced to follow you until the next opportunity for overtaking presents itself.

The track change corner consists of two track parts and offers the possibility to overtake from the outside to the inside lane. The tracks are on a scale of 1:24 and can be used for digital race tracks such as the Carrera DIGITAL 124, Carrera DIGITAL 132 and the digitally upgraded Carrera EVOLUTION. This extension set brings extra fun to your race track.
