Description

When the Chris-Craft Racing Hydroplane was first delivered, it was accompanied with a warning "FOR RACING ONLY". Chris-Craft knew that they had a thoroughbred on their hands. Equipped with a high-performance 121 horsepower K6 engine (showcased in the three in-line carburetors protruded above the deck), streamlined red fairing, designed to shield the carburetors, came to symbolize one of the fastest and most desirable Chris-Craft boats of the pre-war years. This kit is very similar in construction to the 197 Racing Runabout, in that it utilizes the popular expanded PVC and mahogany double planking method. The new 16 Hydroplane kit includes all the items you have come to expect from a Dumas kit: Step-by-Step instructions, flag, decal, chrome plated fittings and laser cut parts.

Running Hardware: Included in kit

SPEDS

Length: 24"

Beam: 8 1/2"

Scale: 1:88

REQUIRED TO COMPLETE: (Sold Separately)
