Description

Key Features:

- Ideal for 3D models 4-8 oz (115-170 g) and sport and scale models 6-12 oz (170-340 g) up to 55 watts
- Designed for firewall mount or carbon tube mount
- Integrated Prop Saver design
- Extremely quiet and lightweight—just 5 ounces (14 grams)
- Upgraded performance motor for indoor FPV and 180 motors
- High-torque, direct-drive alternative to brushless
- Includes mount, mounting hardware and 2mm gold BL connectors
- High-quality construction with ball bearings and hardened steel shaft
- Steel lightweight bushings for small motor frames
- Ideal for 3D models 4-8 oz (115-170 g), and sport and scale models 6-12 oz (170-340 g) or models requiring up to 55 watts of power

Specs:

- Type: Brushless outrunner
- Size: Upgrade for 180-size
- Bearings or Bushings: Bearings
- Recommended Prop Range: 5.5 x 4.5-8 x 6 Slow Flyer
- Voltage: E-3.3V
- RPM/Volt (KV): 220V
- Resistance (R): .25 ohms
- Idle Current (mA): 150
- Continuous Current: 7A
- Maximum Burst Current: 9A (15 sec)
- Cells: 6 NiMH/Ni-Cd or 2 LiPo
- Speed Control: 5A-10A Brushless
- Weight: 14 g (0.5 oz)
- Overall Diameter: 22mm (.88 in)
- Overall Length: 23mm (.90 in)
- Needed to Complete:
- 3-10A brushless ESC

3S Li-Po or 5- to 7-cell Ni-Cd/Ni-MH

5.5 x 4.5-8 x 6 Slow Flyer prop
