ManufacturerEmax

Description

- Easy to revert output shaft direction.
- Adopts 0.2mm silicon steel, ensures high performance and low temperature.
- GT Series motors have a better compatibility with more different speed controllers and propellers.
- GT Series utilizes imported bearings.
- Compare to other series motors, the GT Series are more precise, lighter in weight and higher in efficiency.
- Ideal for planes in the 600-800g range.

SPECS:

RPM/V: 1780 RMP/V

Weight: 55g
