Description

FS-ZCZ-STW01 is a potentiometer steering wheel gimbal that simulates the real steering wheel control angle of a car to provide players with a simulated driving experience. It can be used for model engineering vehicles, and can be adapted to air transmitters that use the potentiometer gimbal, such as the FS-S18 transmitter.

RFID:

Brand: Flysky

Product NO.: FS-ZCZ-STW01

Product Name: Potentiometer Steering Wheel Gimbal

Color: Black

Applicable Transmitter: FS-S18, FS-i6S and FS-i4 series and other transmitters supporting potentiometer gimbal

Applicable Model: Engineering vehicle

Linearity: >95%

Resolution: 4096

Rotation Angle: 1080° (Single Axis)

Turn Signal Light: Yes

Input Power: 3.3 ±0.2VDC
