Description

FEATURES

It is suitable for the modification of various 2.4G turners and 2.4G model airplane remote control.

FS-FRA01 is an orthogonal 2.4G directional antenna with a working frequency of 2.400-2.484GHz and a gain of up to 3dB.

Taking into account the horizontal and vertical radiation angles, the radiation angle reaches a balanced 100 degrees, and the signal release is stable and superior.

With a compact size and light weight, no wires to give any burden to your RC Model.

SPECS

Product Model: FS-FRA01

Working Frequency: 2400-2484MHz

Gain: 3dB

Standing Wave: less than 1.5

Antenna Efficiency: greater than 70%

Input Impedance: 50 ohm

Polarization Method: vertical polarization

Interface: 2P-SMA

Horizontal Angle: 100°

Vertical Angle: 100°

Temperature Range: -40° ~+85°

Dimensions: 10x x 7.8 x 2 mm

Body Weight: 18.6g

Color: Black
