## Description

### FEATURES

- High performance but low price, users can own this reliable race-ready ESC at an affordable cost.
- Compact size, suitable for various car chassis.
- Auto identification system can recognize sensored / sensorless brushless motors automatically.
- Core competition program for excellent control feels & multiple programmable items.
- Steps of timing adjustment greatly increase the output power of the motor and unlock its maximum potential.
- Proportional brake with 4 steps of Maximum Brake Force adjustment, 8 steps of Drag Brake Force adjustment and 4 steps of Initial Brake Force adjustment.
- 4 steps of acceleration (punch) adjustment, from "soft" to "very aggressive" to fit for different kinds of cars, tires and tracks.
- Multiple protections: Low voltage cut-off protection for Lipo or NiMH battery / Over-heat protection / Throttle signal loss protection / Motor Lock-up protection.
- One-button (the "SET" button on the ESC) to set the ESC, and easy to reset all parameters to the factory default setting.
- Compatible with the optional device - the portable Digital LED Program Card, especially convenient for outdoor use. (purchase separately)

### SPECS

- Rated / Peak Current: 120A / 250A
- Applicable: 1/10th and 1/12th RC Car.
- Motor Limit:
  - 3-Cell NiMH / 2S Lipo: 33.5T (1/10 On-road), 34.5T (1/10 Off-road)
  - 3-Cell NiMH / 3S Lipo: 38.5T (1/10 On-road), 39.5T (1/10 Off-road)
- Battery: 4-8 Cells NiMH / 2-3S Lipo
- BEC Output: 5V@3A, Linear Mode
- Cooling Fan: Powered by the battery

Dimensions/Weight: 43 x 36 x 33mm (w/ Fan) / 10g (w/ Wires and Fan)

Note: "T" indicates the limit value of motor turns when the ESC timing is set to 0 degree. The larger the timing, the more turns the motor needs. Please pay close attention to temperatures of the motor and the ESC to avoid any damage.
