### Description

This UBEC is an external switching mode DC-DC regulator. It draws DC voltage from 2-6S LiPo battery, drops it to a voltage level that is suitable for your receivers and other electronic devices, and keeps providing the stable current output of 3Amp. It's compatible with different brands of ESCs.

**BECS:**

**Input Voltage/Current:** 5V @3A / 0V@3A (depends on jumper cap)

**Input Voltage:** 5.5-26V (2-6S LiPo@-1S Cells, NiMH/NiCd)

**Size:** 43x17x7mm (LxWxH)

**Weight:** 11g

**Ripple:** less than 50mVp-p (@2A/12V input)
