### Description

This is the Hobbywing Quicrun Brushed 550 Motor. These freshly designed motors offer excellent power and control at an affordable price. Using specialized carbon brushes gives these motors an exceptional lifespan and helps to provide great slow speed control. The 5-Slot internal design gives the user great overall power for the balance of low speed torque and high RPM performance. Available in several sizes and turns the Hobbywing Quicrun brushed motors are a great choice for your next build.
