### Description

Thanks to its outstanding response and control, the 13T Quicrun Brushed 555 motor is ready for the next 1/10 scale adventure. The adjustable motor timing can be selected in the range between -20° and +20°. And the more precisely this value is set to your own preferences, the better the driving experience.

Due to the high-quality materials used in the manufacturing process, the motors of this Quicrun Brushed series certainly meet the high demands of today's driving conditions. These include the heat-resistant magnet and the built-in copper wires, which can withstand temperatures of up to 200°C. The brushes were specially developed so that, due to their extremely long service life, they give the impression of being brushless motors.

Another highlight is the permanently mounted PCB anti-interference boards, each with two soldered capacitors to ensure a less stressful driving experience.

#### FEATURES:

Modern motor for 1/10 On-Road and Off-Road action

Great efficiency

Adjustable timing

High-torque torque design

PCB PCB board to avoid interference

Easily disassembled for maintenance work

#### SPECS:

Type: Brushed

Turns: 13T

RPM @ 2.4V: 14.000

Input Voltage: Less and equal to 12.6V

Span: 2

Length: 58.5mm

Diameter: 35mm

Shaft Diameter: 3.175mm

Weight: 19.3g

Application: 1/10 Crawler, Short Course Truck, Monster Truck
