Description

FEATURES

Excellent waterproof design (rates as IP 67) allows this ESC to work in water without any extra precautions.

High quality components have very strong over-current withstanding capabilities.

Patented Copper Heat Conduction technology and high-efficiency water-cooling system can easily dissipate the heat produced in operation under high load.

The special firmware designed for RC boats can make the acceleration punchier and the sailing more stable.

The external Programming Port can connect to the LCD Program Box for easily setting the parameters of the ESC.

Multiple protections like low-voltage cutoff protection, thermal protection and throttle signal loss protection, make the ESC more reliable.

SPECS

Model / SKU: Seaking-180A-V3/ 30302181011

Cont. Peak Current: 180A/1080A

Best Applicable Boat length: 130cm

Input: 2-SS Lipo

ESC Type / ESC Output: Switch Mode BV/BL

External Programming Port: available

Water Cooling Pipe: Inside / Outside: 23.0 / 4.4mm

Input wire: Red-10AWG-200mm*1, Black-10AWG-200mm*1

Output wire: Black-10AWG-150mm*3

Size / Weight: 72x48x36.6mm (include the Water Cooling Pipe) 207g
