### Description

#### Introduction

Now it's easier than ever to learn to fly RC (Radio Controlled) airplanes in more places and smaller spaces with the HobbyZone® XCub 450mm! Its ultra-micro size makes it perfect for flying in large yards, parks, soccer fields, and other suitable spaces where larger "trainer" models can't typically be flown successfully by first-time pilots. Plus, it features a "pop-off" prop saver design and incredibly tough EPP construction that makes it one of the most durable trainer airplanes yet!

Best of all, it also features SAFE® (Sensor Assisted Flight Envelope) technology that helps prevent overcontrol, loss of orientation, and crashes so nearly everyone can learn to fly successfully! The 100% factory-assembled airframe is equipped with a reliable electric power system, receiver, and servos. It's also RTF (Ready-To-Fly) right out of the box including two rechargeable batteries, a charger, and a controller/transmitter so there's nothing else you need to buy or provide to fly!

#### LEARN TO FLY SUCCESSFULLY!

Welcome to the exciting world of RC (Radio Controlled) flight! If you've ever dreamed of taking to the skies, Horizon Hobby has you covered. We are committed to engineering aircraft that you can learn to fly with successfully even if you've never flown RC before. Every HobbyZone® aircraft we offer features industry-leading design and technology developed by experts to keep you in control and learning at your own pace so you can turn your dreams of flight into a reality!

The HobbyZone XCub 450mm is a scale replica of the popular XCub by CubCrafters, which is the safest and most extensively tested adventure airplane ever! It's also an upgraded and modern iteration of the Super Cub and the classic J-3 Cub that came before it – which was one of the most popular trainer aircraft designs before WWII. That's a big part of why the XCub 450mm makes learning to fly radio controlled (RC) airplanes in more places and smaller spaces easy and fun!

Its ultra-micro size makes it an ideal choice for a smaller trainer model that can be flown in large yards, parks, soccer fields, and other suitable spaces where larger models can't typically be flown successfully by first-time pilots. Best of all, it's equipped with Sensor Assisted Flight Envelope (SAFE) technology that helps prevent overcontrol, loss of orientation, and crashes so nearly everyone can learn to fly successfully! Beginner, Intermediate, and Experienced flight modes allow you to choose the level of stability and control you need, or are ready to try, at the flip of a switch!

And the fun doesn't stop when you learn how to fly! The lightweight yet extremely durable EPP airframe is equipped with a powerful electric motor that delivers long flight times and provides plenty of speed and power to perform aerobatic maneuvers including loops, rolls, and even inverted (upside down) flight in the Experienced mode. Or, if you're not ready to perform aerobatics on your own, the XCub can automatically perform single or even multiple loops or rolls in the Beginner or Intermediate flight modes with just a quick press of the "Aerobatics" button and by moving the control stick in the desired direction!

This Ready-To-Fly (RTF) model includes everything needed to fly in one box and is a perfect choice if you're a new RC pilot. From the 5-channel 2.4GHz controller/transmitter and the AA batteries for it, to the two 1S 400mAh rechargeable Lithium Polymer (LiPo) batteries and a convenient charger that can be used with a variety of USB power sources, there's nothing extra you need to buy or provide! There's even a spare propeller featuring the unique "pop-off" prop saver design included in the rare chance you might need it!

#### FEATURES

One of the most durable and easiest to fly trainer models yet for beginner RC (Radio Controlled) airplane pilots!

A scale replica of the safest and most extensively tested adventure airplane ever – the XCub by CubCrafters!

100% complete and ready to fly right out of the box – there's nothing extra to buy so it's an incredible value!

Equipped with SAFE technology that helps prevent crashes and makes it easy for everyone to learn how to fly!

Beginner, Intermediate and Experienced flight modes you can easily change between any time at the flip of a switch!

Includes a 5-channel controller/transmitter with 2.4GHz technology and features 4-channels of control for training (and full aerobatic flight capabilities)!

Capable of aerobatic maneuvers including loops, rolls, and even upside down (inverted) flight in the Experienced flight mode!

Lightweight yet incredibly durable EPP construction perfect for first-time pilots!

Automatic aerobatic mode activates at the push of a button to perform single or multiple loops or rolls in the Beginner and Intermediate modes!

Powerful and efficient electric motor for easy operation, excellent performance, and long flight times!

Includes two rechargeable 1S 400mAh LiPo batteries and a USB charger for convenient recharging!

Takes off from and lands on smooth surfaces using the included landing gear plus oleo-rubber ballbeats!

Remove the landing gear to easily hand launch over than land on grass or other suitable surface!

Features a unique "pop-off" prop saver design to prevent damage plus includes a spare propeller!

Ultra-micro sized to fly in large yards, parks, at sports fields and beyond!

Replacement/spare parts and batteries are readily available!

No FAA registration or Remote ID required (under the 250-gram weight limit)!

# Discounted Planes : Hobbyzone XCub 450mm RTF w/ SAFE

## SPECS

Product Weight: With Battery: 2.5oz (70.4g) - Without Battery: 2.1oz (59.1g)

Battery: Included

Product Length: 12.87" (328 mm)

Material: EPP

Power Type: Electric

Servos: Included

Skill Level: Level 1

Trim Scheme Color: Yellow and White

Wingspan: 17.77" (450 mm)

Lipo Compatibility: 1S

Completion Level: Ready-To-Fly

Battery Connector: Maxx 61006-2P

Radio: Included

Technology: SAFE

Speed Control: Included

Charger: Included

Receiver: Included

## IN THE BOX

(1) HobbyZone XCub 450mm

(1) Electric Motor (installed)

(1) Rotary Aileron Servo (installed)

(1) Receiver, ESC and (2) Rotary Servo Control Unit (installed)

(1) 5-Channel 2.4GHz Controller/Transmitter

(1) AA Alkaline Batteries (for the controller/transmitter)

(2) 400mAh 1S 3.7V Lipo Batteries

(1) USB Lipo Battery Charger

(1) Spare Propeller with Prop Servo

(1) Product Manual

## NEEDED TO COMPLETE

Nothing! Everything you need to fly and begin having fun is included!
