Description

OVERVIEW

It wasn't easy to improve on the 3400G servo with a 470 3D gyro for 450 and 500-size micro-electric helis, but JR engineers have done it. The DS3500G boasts .05 transit time along with big servo precision. Provides "big helicopter feel" for ultra-precise hovering and locked-in yaw control for aggressive 3D performance.
