Description

RealFlight Evolution "evolves" the world's most popular RC flight sim with a modern user interface while adding dozens of fields and more than 100 additional aircraft models. It also gives you access to new models and fields that are released quarterly!

A fresh and modern user interface that's even easier and more intuitive to use, virtually eliminating the need to use a mouse or keyboard with the InterLink DX controller.

More than a dozen of the newest and most popular ultra micro, sport, scale, EDF and trainer aircraft from E-flite, HobbyZone and Hanger 9 plus multiple helicopters from Blade.

Fly at the newest "PhotoField"™ — the main flying site from Triple Tree Aerodrome, home of the world-famous "Joe Nall" and other events!

More than 100 additional aircraft plus dozens of 3D fields and PhotoFields previously only available separately via Expansion Packs!

Access to new models and fields released quarterly (starting in early 2023) for purchase à la carte, in money-saving content packs, or with yearly season passes!

IN THE BOX:

1) Spektrum™ InterLink® DX Simulator Controller

1) RealFlight Evolution Steam® Key (see card)

1) RealFlight Evolution Installation Guide

NEEDED TO COMPLETE:

Compatible PC laptop or desktop with Windows® 8, Windows 10 or Windows 11

Internet connection to download the Steam® Client and RealFlight Evolution software

The most modern, feature-packed, and expandable RC flight simulator yet! For more than two decades, RealFlight® has been the #1 RC flight simulator in the world! It's the absolute best tool new RC pilots can use when learning how to fly. It also makes it possible for experienced RC pilots to practice new maneuvers and hone their skills so they can become even better pilots. Plus, it's the best way to "try" new Horizon Hobby and other models before you buy them!

With more than 300 different aircraft to fly — including airplanes, helicopters, drones, and more — at over 75 different flying sites, plus the ability to edit and add aircraft and sites, there's an almost infinite number of flying options available. Add in Virtual Flight instructor lessons, game-like challenges, multiplayer options so you can fly and compete with other pilots online, compatibility with VR headsets, and many, many more features, and you have everything you need to succeed at the field — because you can "fly" on a desktop at home, or on a laptop just about anywhere else!

RealFlight Evolution "evolves" the world's most popular RC flight sim with a fresh and modern user interface, adds the main flying site from Triple Tree Aerodrome — home of the world-famous "Joe Nall" and other events — plus dozens of other 3D fields and PhotoFields. It also adds more than a dozen of the newest and most popular aircraft from E-flite®, HobbyZone®, Hangar 9® and Blade®, and more than 100 additional aircraft models. Best of all, it also gives you access to new models and fields that will be released quarterly (starting in early 2023) for purchase à la carte, in money-saving content packs, or with yearly season passes!

That access to new models and fields comes as a result of RealFlight Evolution being delivered exclusively via Steam® — the world's largest digital distribution platform for PC games and simulators. Steam eliminates the need to use DVDs and compatible drives for installation, provides seamless and automatic software updates, and even allows you to install RF Evolution on multiple PCs using the Steam Client and your account. There's no serial number to lose over time and it's easier than ever to add RealFlight to additional PCs in the future!

RF Evolution runs on a wide variety of PCs (Personal Computers) from low-cost laptops to "gaming" desktops running Windows® 8, 10 or 11. It's available as software only, or with the Spektrum™ InterLink® DX Simulator Controller — which connects directly to a USB port for easy plug-and-play use — that's modeled after Spektrum transmitters including all standard switch locations and functions so it works just like your favorite radio! Or you can use the WS2000 USB Dongle (sold separately) with a compatible Spektrum 2.4GHz transmitter, like the DXS transmitter included with many of the most popular Ready-To-Fly (RTF) trainer aircraft, for wireless operation. It's even compatible with direct USB connection to Spektrum NX6, NX6, NX10 and other transmitters!

RealFlight Evolution includes some of the newest and most popular aircraft from E-flite, HobbyZone, Hangar 9 and Blade:

E-flite LMX Timber X with AS3X® and SAFE® Select Technologies

E-flite LMX Ultra with AS3X and SAFE Select Technologies

E-flite LMX Radar with AS3X and SAFE Select Technologies

E-flite Night Radar 2.0m with AS3X and SAFE Select Technologies

E-flite T-28 Trojan 1.2m with AS3X and SAFE Select Technologies

E-flite Hahu SS (Super Sport) 50mm EDF with AS3X and SAFE Select Technologies

E-flite Hahu SS (Super Sport) 70mm EDF with AS3X and SAFE Select Technologies

E-flite F-16 Falcon 80mm EDF with AS3X and SAFE Select Technologies

Flight Sims: RealFlight Evolution RC Flight Sim W/ InterLink

Elite Viper 30mm EDF with ASXX and SAFE Select Technologies

HobbyZone Carbon Cub S2 1.3m with SAFE Technology

Hanger 9 Fun Scale F1 78 56 37 2"

Hanger 9 Ultra Stick 607 10cc

Hanger 9 Ultra Stick 607 10cc

Blade 150 S Helicopter with AS3X and SAFE Technologies

Blade iHawkeye 181 Helicopter with AS3X and SAFE Technologies

Blade Fusion 480 (850) Strata Helicopter

If you purchased RealFlight 9.5S at any time you will receive a free copy of RealFlight Evolution. Internet connectivity is required to download the software via Steam after RC Evolution is released on October 26th, 2022.

If you purchased RealFlight 9 or 9.5 at any time you can exchange the serial number for a Steam key to update to 9.5S at no charge. Internet connectivity is required to complete the exchange using the link below.

flm-keyexchange.realflight.com/

Then you can purchase and download RC Evolution via Steam at the discounted price of \$70 (versus the regular price of \$99.99) after it's released on October 26th, 2022.

New RealFlight Evolution Features

Fresh and modern user interface that's even easier and more intuitive to use, virtually eliminating the need to use a mouse or keyboard with the InterLink DX controller.

More than a dozen of the newest and most popular ultra micro, sport, scale, EDF and trainer aircraft from E-flite, HobbyZone and Hanger 9 plus multiple helicopters from Blade.

Fly at the newest PhotoFields™ – the most flying sites from Triple Tree Aerodrome, home of the world-famous "Low Ball" and other events.

More than 100 additional aircraft plus dozens of 3D fields and PhotoFields previously only available separately via Expansion Packs.

Access to new models and fields released quarterly (starting in early 2023) for purchase à la carte, in money-saving content packs, or with yearly season passes.

Additional Virtual Flight instructor lessons for new pilots learning to fly with the HobbyZone AeroScout 1.1m.

Additional RealFlight Features

Industry-leading True-To-Life™ physics that make every flight more lifelike than any other sim.

A simple and intuitive interface for zero learning curve, zero faecal, and more fun.

More than 300 aircraft including airplanes, helicopters, drones, and more.

Over 75 different flying sites including 3D fields and PhotoFields.

RealFlight™ Site Editor so you can make fields your own.

The ability to edit aircraft and import custom aircraft.

Virtual Flight Instructor lessons perfect for new pilots.

Game-like challenges that make flying fun and interactive.

Multiplayer options so you can fly or compete with other pilots online.

Compatible with Oculus™ Rift, Meta Quest, HTC Vive™ and other SteamVR-compatible headsets (sold separately).

Works with Spektrum wireless simulator dongles for use with compatible DSM2/DSMX equipped transmitters (sold separately).

Compatible with Spektrum NX6, NX8, NX10 and other transmitters (sold separately) via direct USB connection.

Spektrum InterLink DX Simulator Controller Features

Modeled after Spektrum transmitters including all standard switch locations and functions so it works just like your favorite radio.

Interdependent orbital design with spring configuration switch for easy Mode 1, 2, 3 or 4 selection and operation.

Exclusive Reset/Restart button for replaying your best maneuvers or resetting after crashes.

Easy and convenient control of most simulator functions right from the controller.

Roll-in sliders help drone pilots zero their cameras in for the best shot.

16-channel capability for effortless control of all available functions.

Prevents wear and tear on your field transmitter.

Optional adapter cord/cable set available separately to use other popular transmitters equipped with a compatible trainer port through the InterLink DX.

Minimum Recommended System

Windows 8 or Windows 10 or Windows 11™

Intel Pentium 4, Q6600 or equivalent

4GB RAM

10 GB Hard Drive Space

NV-D Drive

3D Accelerated Video with

64 MB Dedicated Video Memory

Fully DirectX 9 compliant (Shader Model 2.0 or better)

Spektrum InterLink DX Simulator Controller, a Spektrum wireless simulator dongle plus a compatible DSM2/DSMX equipped transmitter, a RealFlight compatible controller, or other compatible Gamepad/Joystick.

Online Activation Required

Internet connectivity required for activation** and to download additional content and updates.

Optimal System

For Best Graphical Performance:

Intel Core 2, i3GHz CPU

8GB RAM

3D Accelerated Video with 512 MB dedicated video memory

Multiplayer Requirements:

Broadband Internet connection

Computer microphone for voice chat

InterLink DX Controller Requirements

USB Port

Compatible FM or FM-selectable transmitter (if using the interface mode)**

VR Requirements:

Compatible with some VR sets (available separately). Check manufacturer's requirements for VR system use.

Works with both the Oculus Rift and HTC Vive™ VR headsets.

*Some graphical features may be disabled. Aerodynamic calculations will remain high quality.

**Administrator access required.

*** Adapter cord/cable set available separately (RFL1015) for use with the InterLink DX that will make it compatible with the trainer jacks on most Futaba® plus all JR6 and Spektrum™ transmitters.

Windows is a registered trademark of Microsoft Corporation in the United States and other countries.
