Description

This is the Savox SB-2272SG "Lightning Speed" Brushless, Metal Gear, High Voltage, Digital Servo.

FEATURES

Combines leading edge technology with super high 12 bit (4096) resolution and unique steel gears.

Super light weight.

Brushless motor provides extremely high speed, incredible efficiency, and low power consumption.

Extremely strong metal gears ensure long life and durability.

The full aluminum case design not only looks good but also allows for cooler and smoother operating temps.

Totally green - from materials to production, these servos are environmentally friendly.

Ideal for 1:10 trucks and buggies, as well as every control surface for giant scale aircraft and 700 class hull rubber applications.

NOTE: Certain combinations of receiver and ESC have been found to cause "Brown Out" issues when combined with Savox servos. An external BEC, or BEC decoupling receiver capacitor may be needed for efficient, glitch free operation in low voltage electric applications.

SPECS

Dimensions: 40.3x20.2x35.7mm

Weight: 20g

Speed:

@ 4.8V: 05 sec/60°

@ 6.0V: 045 sec/60°

@ 7.4V: 032 sec/60°

Torque:

@ 4.8V: 41.7 oz-in

@ 6.0V: 68.4 oz-in

@ 7.4V: 97.2 oz-in

Case: Metal

Rating: 25%

Case: Full Aluminum

Output Shaft: 25 Tooth Spline
