Description

FEATURES

Excellent waterproof design (rate as IP 67) allows this ESC to work in water without any extra precautions.

High quality components have very strong over-current withstanding capabilities.

Patented Copper Heat Conduction technology and high-efficiency water cooling system can easily dissipate the heat produced in operation under high load.

The special firmware designed for RC boats can make the acceleration punches and the sailing more stable.

The external Programming Port can connect to the LED Program Box for easily setting the parameters of the ESC.

Multiple protections like low-voltage cutoff protection, thermal protection and throttle signal loss protection, make the ESC more reliable.

SET UP / Troubleshooting - make it very easy.

SPECS

ModelSKU: Seaking-120A-V3-303021201A

Boat Peak Current: 120A(72V)

Boat Adjustable Boat length: 110cm

Input: 2SS Lipo

ESC Type / ESC Output: Switch Mode (B/V/S)

External Programming Port: available

Water Cooling Pipe: Inside / Outside: 23.0 / 5.4mm

Input wire: Red-12AWG-200mm*1, Black-12AWG-200mm*1

Output wire: Black-12AWG-150mm*3

Size/Weight: 68.5x38.4x32mm, include the Water Cooling Pipe = 150g
