### Description

BD380 380W Battery Discharger Analyzer to overcome high-capacity challenges and a robust 40A current for fast, accurate conditioning. Versatile up to 30V, it handles all battery types. The BD380 simplifies battery management by offering a smartphone app with built-in Bluetooth control, as well as PC/Mac software accessible via a Type-C connection.

#### NOTE

BD380 is a powerful discharge device that allows the user to discharge a battery up to 40 amps or 380 watts. It displays real-time battery voltage, discharge capacity and discharge current.

The BD380 enables accurate battery capacity measurement and eliminates the guesswork of choosing the best battery for your application. It saves time when users want to store their high-capacity batteries.

The BD380 is much more than a simple battery discharger or load tester. It will test virtually any battery type or size, any chemistry or number of cells, up to 30 volts.

The BD380 is ruggedly built and uses an XT60 connector for battery connection. It's small in size and features a high-performance cooling system. The display shows battery voltage, discharge capacity, and charge current.

BD380 helps you unlock the best performance from your batteries for racing. It's compatible with Android and iOS and is free to download.

#### SPECS

Working voltage: DC 3.0V-30.0V

Discharge voltage range:

When connected to an external power supply: 3.0V-30.0V

Main part only: 3.0V-30.0V

Entry threshold:

Less than 4.0 V

Greater than 30.5 V

Discharge power: Max.380W

Discharge current: 0.3A-40.0A

Connector: XT60

DC constant current: 0.3A-40A

Constant resistance CR: 1-10Ω

Constant power CP: 1-380W

Constant voltage CV (Note: Do not connect the battery in this mode). The maximum power is 180W

Size: 160x120x110mm

Note: Set the maximum allowable current for the input voltage application. iOS/Android

#### INCLUDED

1 x BD380

1 x Instruction manual

1 x Cable
