Description

The SkyRC T1000 Maestro is a highly advanced charger specifically designed for hobbyists and professionals in the model building field. With a power output of up to 1000 W and a maximum charging capacity of 2020A, this device is ideal for simultaneously charging multiple batteries.

FEATURES:

Dual charger with two independent channels.

Maximum power of 1000W, perfect for high-capacity batteries.

Compatible with various battery types, including LiPo, Li-Ion, NiMH, NiCd, and Pb.

Intuitive user interface with a large color display for easy operation.

Comprehensive safety features, such as overcurrent, overtemperature, and short circuit protection.

APPLICATIONS:

The SkyRC T1000 Maestro is suitable for numerous applications, including RC models, drones, airplanes, and many other uses where a reliable and powerful charging unit is required.

SPECS:

Output Power: 2 x 20A

Total Power: 1000W

Battery Types: LiPo, Li-Ion, NiMH, NiCd, Pb

Display: Large color display

Safety Features: Overcurrent, overtemperature, and short circuit protection

Choose the SkyRC T1000 Maestro to meet your charging needs while ensuring reliable performance and high safety. Perfect for anyone involved in the world of model building!
