Description

Built around frequency-agile DSMR technology, the Spektrum™ SR6200A 6-channel DSMR receiver delivers superb range and response along with unbreakable signal security in a compact, easy-to-install package. AVC (Active Vehicle Control™) technology increases your stability on tough terrain. Compatible with innovative Smart Technology, the SR6200A receiver also provides real-time telemetry data when used with a Smart ESC and Smart battery.

FEATURES

- 6-channel DSMR / DSM2 receiver
- Compact size better fits in tight spaces and airframes
- Long antenna for better range and reception
- Works by telemetry capabilities with Spektrum Firma Smart ESC
- Great for models that will benefit from AVC Technology that need additional channels for lights, shift servos and other accessories
- Steering priority puts the driver in complete control
- Fully adjustable set the precise amount of stability you want or turn off if desired
- Water resistant "Pellicote" coating protects electronics
- Works with any RC car, truck or buggy
- Compatible with all DSMR transmitters

SPECS

- Forward Programming: No
- Product Length: 1.531 (39 mm)
- Range: 2.4GHz
- Peak Voltage: 3.5 – 3.8V
- Product Application: Surface
- Product Height: 0.547 (14 mm)
- Serial Out: None
- Bind Method: Bind Button
- Range: F3D
- Telemetry Range: Drive By
- Application: Surface
- Halfcut: Yes
- Product Weight: 0.526oz (15.3g)
- Antenna Length: 9.7 (250 mm)
- Product Width: 0.951 (24 mm)
- Remote Receiver Ports: 0
- Technology: AVC
- Modulation: DSMR
- Telemetry: Yes
- Channels: 6
- Integrated Variometer: No
