Description

Tamiya's Spray-Work Airbrush Set which came out in 1988 was well received for its easy use and effectiveness when spraying camouflage and graduation patterns. It has however now evolved to the next level.

The compressor now comes in convenient case form, and operating noise has been considerably reduced. This new set also features improved spray stability and control. With a nozzle diameter of 0.9mm, beginners should find the airbrush easy to use. From 2mm-thin lines to base coat, this set can be used with ease to paint a variety of surfaces. Compressor uses a re-chargeable 7.2V Battery Pack (Sold separately).

Compressor: 5Watt(s)

Size: length-220mm, width-100mm, height-130mm

Compressor weight: approximately 300g

Maximum continuous running time with 7.2V battery: approximately 20min. (1400mAh); approximately 30min. (1700mAh)

Maximum air pressure: approximately 0.11Mpa (approximately 1.1kgf/cm²)

Maximum air output: 20 litres per minute (unburdened)
