### Description

This kit is ready to run and includes 1 x 7.4V 1650mAh Li-ion battery (T plug), discharge rate 16C

#### SPCS

1. Material: Hardware: Electronic: Plastic

1. 1:6 Electric four-wheel drive coupe, brushless motor

1. 2840 brushless motor (4000 KV value)

1. ESC/Receiver: 3SA ESC/Receiver integrated control (splash-proof)

1. Body battery: 7.4V 1650mAh 16C Li-ion battery (T plug)

1. Servo: Three-wire 170 digital servo

1. Remote control battery: 3 AA (not included)

1. Charger: USB Balance Charger

1. Frequency: 2.4GHz (support multiple cars to compete in the same field)

1. Remote control distance: 7-10 meters

1. Remote control category: full scale synchronous control system (gun control)

1. Running time: 15-18 minutes (continuous running at full speed)

1. Charging time: 3-3.5 hours (USB balance charger)

1. Wheelbase: 195mm

1. Wheel base: 188mm

1. Wheel diameter: 65mm

1. Speed: 70 km/h (top speed)

1. Protection functions:

1. 1. Charging

1. 2. Stop

1. 3. High temperature

1. 4. Low voltage

1. IMPORTANT

1. 1. Charging protection: constant current and constant voltage balance charging, protection function for battery overcharge and overcurrent

1. 2. Motor anti-jamming protection: when overloaded, the motor stops working

1. 3. High temperature protection: When the working temperature is higher than the set condition, the drive control circuit stops working, and resumes work when the temperature drops to a safe value

1. 4. ESC low-voltage power-off function: when the battery is lower than about 6.3-6.4V, it will automatically power off to prevent the battery from being damaged by over-discharge

#### FEATURES

1. Has the control feeling of a real car, and realizes full-scale continuously variable speed change, high-speed driving, rapid acceleration, deceleration, braking, reversing, left turn, right turn

1. Applicable for: flat, sand, mud, grass

1. Four-wheel drive, front and rear upright spring shock absorption, double wishbone independent suspension system

2.4G full-scale synchronous remote control system; Full-scale front-steering;

Metal differential, metal differential cup, powder planetary gear, powder driving gear, powder main gear;

Metal CVD front drive shaft, metal rear ssg bone, metal wheel cup;

1.18seconds 17C digital servo;

7.4V 1850-1900mAh Li-ion battery (T plug), discharge rate 15C;

New remote control panel function: rubber size adjustment;

The whole vehicle adopts 16 ball bearings;

Metal second floor, metal front and rear arm yards, metal middle drive shaft;

The car shell adopts high toughness explosion-proof PVC car shell;

Equipped with LED headlights, three modes: always on, slow flash, fast flash;

Equipped with head-up wheel;

Simulation of big feet tires, strong grip;

**INCLUDED:**

1 x 1:18 Scale Model RC car;

1 x 7.4V 1850mAh 15C Li-ion battery (T plug);

1 x 2.4G Remote Control;

1 x USB Balance Charger;

1 x Rear wing;

1 x Wheelie bar;

1 x Hex Spanner;

1 x Instruction manual;
