Description

Note: This is a plastic kit and must be assembled and painted.

This 1/24 scale model assembly kit recreates the NEW 2019 Toyota Supra. Upon its global announcement in January 2019, the TOYOTA GR Supra created a worldwide buzz.

Designed with beautiful balance, it provides superturbo handling and stable corners, while the sensuous long nose, short deck form has a striking double-bubble roof. Combined with impeccable power from a turbocharged inline-six or inline-four engine, the GR Supra is set to define the next generation of performance.

Length: 18.9cm, width: 85mm, height: 54mm.

It features a realistic interior depiction, with separate white parts for red sections, plus multi-part center console and dashboard, and seats with separate headrest components.

It can be assembled as Japan, U.S. or Europe spec, with dedicated left- and right-hand drive part positions.

A detailed underside shows off the exhaust system, plus multi-part front and rear suspension.

*Features the 19-inch wheels exclusive to the top grade RZ car in Japan. They are two-part designs with separate metal-plated and black components. Tires have realistic tread.

*Includes metal transfers, plus paint masking stickers for window areas.
