Description

Warning - Never use these paints on plastic building model kits.

These spray paints were developed especially for decorating transparent polycarbonate bodies used in R/C car modeling. Each can contains 100ml of paint, which is the appropriate amount for finishing the body shell.

Paint the body from the inside, keeping the can about 30cm from the surface. After curing, apply another coat. Small details should be brush painted beforehand, using Tamiya bottle paints for polycarbonates.

These paints are impervious to oil and fuels, so they can be safely used on gas-powered R/C bodies.
