Description

This edition of the Scania 770 S 6x4 comes with the body pre-painted in TS-17 Gloss Aluminium, plus a urethane top coating for a high-quality finish.

Tamiya's series of ultra-realistic 1/14 scale RC trucks has offered fun and realistic driving for the past several decades! This kit adds to the selection of trucks available in the series with the Scania 770 S 6x4.

The kit seen here recreates the Scania 770 S 6x4 produced by the Swedish manufacturer Scania. The Scania 770 S 6x4 is one of the trailer heads in Scania's top-grade S Series – which had undergone a full model change in 2016. This trailer head features a double rear-axle drive 6x4 chassis equipped with a 16.4-liter V8 diesel turbo engine capable of 770hp, which was the most powerful in the industry as of 2020.

1/14 scale RC model assembly kit. Length: 538mm, width: 189mm, height: 307mm.

Realistic roof bar features light pods, grille, mini bar, low bar, and side bars. LEDs (sold separately) are also attachable.

Just like the actual vehicle, a double rear-axle 6x4 chassis features a layout of motor and transmission positioned at the front.

The ladder frame features aluminum side channels with plastic cross members and is equipped with a coupler to enable linkage with semi-trailers.

Highly realistic suspension utilizes metal leaf springs and friction dampers.

Tractor parts such as modern-design dashboard and seats are included.

Assembly type 3-speed transmission allows gear changes via separately available 4-channel radio transmitter.

Multi-Function Control Unit (Item 56523: MFC-03, sold separately) offers light, sound, and vibration operation.

Requires: 4-channel Tamiya Attack Radio, two servos, 7.2volt battery with compatible charger, and Tamiya modelling paints for finishing details.
