Description

Note: Available in RED, GREEN and GREY colors.

The Traxxas TRX-4 1/10 Trail Crawler Truck with the Defender Clipless Body captures the spirit of the classic Land Rover Defender with unmatched detail and performance. Traxxas brings together the retro design of the iconic Defender with cutting-edge features, making this model a top choice for RC enthusiasts. From its realistic chrome details to advanced crawling technology, this truck is designed to conquer challenging terrain while maintaining the authenticity of its full-size counterpart.

NEW!

Clipless Body Mounting System

The TRX-4 Defender introduces a clipless body mounting system that provides a clean, streamlined look without visible body clips. This innovative feature uses hidden slots to securely fasten the body, allowing quick and easy removal for maintenance. Whether you're on the trail or displaying it at home, the clipless design offers both aesthetics and convenience.

Portal Axles for Maximum Clearance

One of the key performance features of the TRX-4 Defender is its portal axles, which elevate the truck for superior ground clearance. These axles reduce torque twist and keep the truck stable over rough terrain. With portal axles, the Defender can tackle obstacles that would challenge other vehicles, making it a standout on any off-road adventure.

Remote Locking Differentials

The T-LoK™ remote locking differentials give you control over the truck's traction, allowing for on-the-fly adjustments to suit the terrain. Switch between fully locked and unlocked modes using the radio system, ensuring optimal performance in any condition. This feature enhances the versatility of the TRX-4, enabling it to conquer both smooth trails and technical rock crawling.

FEATURES

Clipless body mounting system

Portal axles for increased ground clearance

Remote locking differentials

High and low transmission

Heavy-duty steel frame rails

Adjustable wheelbase
