Description

A complete workshop driven by a powerful steam engine.

The countershaft fixed under the roof drives the circular saw, the two wheel grinder, the drilling machine and the hack saw, like in grandpa's days.

Technical details:

Minor polished and rock-polished boiler, diameter 55 mm, length 135 mm, boiler capacity 520 cm³, with water gauge glass.

The boiler house is true to life, coloured and copper-plated with embossed brick type walls, 2 footholds with ladders.

Double-acting reversible brass cylinder with flywheel, spring loaded safety valve, pressure gauge, flywheel of 50 mm diameter with grooved pulley, steam jet oiler.

All condensed water is collected in a gathering tray below the smoke stack and the waste steam is exhausted through the smoke stack.

Finely painted metal base plate 440 x 230 mm, Height 320 mm.
